'I would still be looking at it as nothing more than a correction at this stage'

Jason Sidney, Market Insight managing director

The Weekend Australian
10-11th June 2006

However, Market Insight managing director Jason Sidney said his charts showed the share market was still holding its long-term trend lines.

His view was that the down movements on the bourse were only a correction, which could last for up to three months.

"I would still be looking at it as nothing more than a correction at this stage," Mr Sidney said.

"The upside to that is it will present a number of buying opportunities for some stocks.

"There is support running for the S&P/ASX 200 at 4814.

"But if it breaks that, that would be of concern and could suggest a possible end to the bull run."
